

Holtville Wetland Site Ownership Map

The map on the following page shows the ownership of the site prior to designation of the area as a potential wetland site. The Holtville site is surrounded on the east and north by the Alamo River, with adjacent owners on the southern boundary (from east to west) being Martinez, who sold a portion of their land for this project and Central Valley Cemetery District, who issued a long term lease of a portion of their property for wetland use. The Rivers property within the footprint of the wetland has been deeded to Holtville.
